Anamika Saha
Managing Editor

Evaluating Design
To determine the feasibility of large infrastructure or building projects, and evaluate their internal and external design considerations, so far, persons entrusted with such decisions have been using linear design processes, including photorealistic 2D images and videos using 3D rendering techniques with photorealistic effects, observes **Rohit Purohit**, CEO, VitorCloud Technologies, and President, Ahmedabad Chapter, VR and AR Association (VRARA).

"Photorealistic renders are considered useful and portable and the skill sets to use

VitorCloud Technologies: Ensuring Customers Leverage Digital Platforms in Measurable Way, not just today, but also Tomorrow

Digital has changed the way organizations are communicating, actively and passively to the internal and external stakeholders. And such changes are brought in rapidly by IT evangelists. Be it from IT teams and/or non-IT teams of the organizations. The challenge today is to cater such new requirements and changes rapidly and with innovative design, user experience, relevance and accessibility in green timeframe. With its innovative and simple approach, Vitorcloud helps clients with improved user experience and measurable results of their spending.

Vitorcloud believes in success of its customers by delivering relevant, measurable and robust solutions which accounts for every penny being spent

A Partner in Real Sense

Vitorcloud believes in success of its customers by delivering relevant, measurable and robust solutions which accounts for every penny being spent. **Vishal Rajpurohit**, CEO, VitorCloud Technologies, says, "Our technical competence enables us to add custom functionalities to pre-existing systems and create digital solutions as per needs of our customers to push for the brand and functional purposes and at the same time dramatic increase in

Rohit Purohit,
CEO

real-time the entire project processing for their investment, and can directly communicate with VitorCloud team 24x7 for any of their issues. "Customers working with us can easily track the progress, get accurate comparison of their & our inputs with the outputs. We facilitate open, collaborative approach with our PMs as Vitor (Vitor is product of Vitorcloud which is going to be launched commercially this year aiming to transform the traditional ways of doing PM from delivery based to cost based success measurement and VPM," says Vishal.
